Originally rumored to be the BlackBerry Thunder, RIM's first touchscreen BlackBerry will debut under the moniker BlackBerry Storm 9530. Expect the BlackBerry Storm 9530 later this year on Verizon Wireless. Wow, Verizon first to score a new BlackBerry. That's usually reserved for AT&T, but I'm sure they'll have their hands full with the BlackBerry Bold release. Engadget reports that the Thunder branding is not dead just yet, with Rogers and Vodafone releasing the 9530 as the Thunder.
