---

A few days ago, we mentioned that Verizon Wireless had emailed their employees about an exciting announcement. Storm clouds were a sure fire giveaway that it was certainly something BlackBerry Storm related. Verizon has indeed launched [www.verizonwireless.com/storm](http://www.verizonwireless.com/storm), but it's nothing more than affirmation that the Storm exists and allows you enter your email address for more information when it's available. As of now, still no official release dates from Verizon, but stay tuned and we'll of course pass along info as it becomes available.
