Just a few weeks ago, it appeared as if Verizon would be prompting Storm owners to [update to OS 4.7.0.141](#)

. According to a report on BGR, OS 4.7.0.141 failed Verizon's testing, thus putting a hold on any potential release. It's unclear if RIM will deliver a revision or move to a release of OS 5.0. Verizon is well known for their strict testing. Vodafone released the same [update](#) last week, but that's only compatible with the BlackBerry Storm 9500.
